Dogs welcome, children on leash  
www.aussiepooch.com.au

Dogs may be used for hunting in Northern Territory Hunting Reserves. You must obtain a permit from the Parks and Wildlife Commission first and keep all dogs on a leash when not hunting.

#### The four designated hunting reserves are:

- Harrison Dam
- Howard Springs Hunting Reserve
- Lambells Lagoon
- Shoal Bay Coastal Reserve.

Before you visit Northern Territory Parks and Reserves, check with the local Parks and Wildlife office. Be sure of the conditions relating to pets in the Parks you are visiting.

### Registration

All dogs over 3 months that have been in Darwin for 1 month must be registered and microchipped

### Dogs In Darwin

##### Katherine Region

Judbarra / Gregory National Park  
Victoria River Depot  
Historical Reserve

**NOTE:** Some restrictions apply, contact the local council for more information

#### Where Can I Leave my Pet?

If it is necessary for your pet to travel with you, it makes sense to check ahead and see where you can leave them whilst visiting certain Parks.

A range of dog kennels and catteries exist near most major towns. Advice on these facilities can be obtained from local regional Tourism Associations.

For a full list of exhibition dates, visit <http://www.dogsnt.com.au/members/exhibition-dates/>

### Cyclones and Thunderstorms

Cyclones and severe thunderstorms affect Darwin during the Wet Season, October to April. Due to the high level of anxiety some pets can feel during these events, there tends to be a large number of pet problems reported, including nuisance barking and pets escaping.

For information and advice call your local council.

### Darwin Ladies Kennel Club

DLKC is a not for profit community group with the aim of promoting and encouraging the breeding of purebred dogs with a strong focus on their usefulness and fitness in the community. We support and encourage interest in the keeping, training and the general wellbeing and improvement of all dogs.

We run show handler training and activities from April to June each year and run several All Breed Championship Dog Shows annually.

Darwin Ladies Kennel Club  
PO Box 2466, Palmerston NT 0831  
[Darwinladieskc@gmail.com](mailto:Darwinladieskc@gmail.com)

### Bicycle and walking paths

In Darwin we have a lengthy and well maintained network of cycle and pedestrian paths. Most of these paths are for shared use, with many people using these facilities with their dogs. You can walk your pet on the path if you are in control of it and it is on a lead. If your pet is not on a lead, it must be 10 meters clear of the path, playground or BBQ area.

### MOORHOLME PET TRANSPORT

### Parks & Beaches

**Knuckey's Lagoon Recreation Reserve**  
Knuckey Lagoon NT 0828  
*Leash required, all waste must be removed*

**Joan Fejo Park**  
Duwun Rd, Rosebery NT 0832

**Morlows Lagoon Pet Park**  
Marlow Lagoon NT 0830  
*Off-leash pet park, completely fenced in*

**Marlows Lagoon Recreation Area**  
Marlow Lagoon NT 0830

### Traveling In The NT With Dogs

Ensure at ALL times your dog has available:

**Water! Water! Water!**  
**Shade**

The NT has a very unforgiving climate and your dog may struggle to adjust, you can help by getting a 2L plastic bottle and filling with water, get a 2nd lid and prick a number of small holes in it which can be squeezed above your dog for a refreshing doggy shower.

Remember that evaporation equals cooling

### Dogs In The Tropics

Make sure you acclimate your pet to your new climate gradually. Take your dog for walks in the day and evening to get him used to all temperature extremes, starting with shorter walks and steadily getting longer. Groom your pet's coat to suit the climate. Longhaired dogs should get a trim for warmer weather, and especially for warm humid weather, where a long coat can actually develop a moldy smell. Keep the water up and available 24/7, take them for a swim or put them under a sprinkler (A small child's pool is great in the yard for dogs).

**NEVER KEEP DOGS IN THE CAR WITHOUT THE AIRCON ON**

### Cane Toad Poisoning

Hold your pets mouth down toward the floor and using paper towel wipe the inside of their mouth. Thoroughly wash the mouth out for 10-15 minutes using a slow trickling hose or tap, have water flowing from the side of the back teeth with the water draining out through the front of the mouth, avoid water going down the throat or into the lungs. Using a wet cloth, gently wipe the gums, tongue and roof of the mouth, rinse the cloth out after each wipe and do for 10 minutes. If your pet settles down after wiping and rinsing the mouth out, keep them confined for a few hours and monitor them closely, transport to a vet immediately (if symptoms worsen)
